Climate risk register template

By DS Consulting | consult-ds.com

A board-ready format for physical and transition risks, with owners, evidence, time horizon, and response actions.

A note on how to use this resource

Climate risk becomes hard to govern when the narrative is separated from the operating register. This template helps teams translate risk themes into owned records that can be reviewed, challenged, escalated, and linked to enterprise risk and disclosure work.

Right for CFOs, CSOs, risk teams, finance leaders, operations teams, and boards preparing for structured climate oversight.

SECTION 1: RISK IDENTIFICATION

- ▣ Separate physical and transition risks clearly.
- ▣ Assign the affected business unit, site, process, or supplier set.
- ▣ Set the risk horizon and the reason it matters commercially.

SECTION 2: EVIDENCE AND CONFIDENCE

- ▣ Record the basis for each risk statement, such as site exposure, policy change, or customer demand shift.
- ▣ Log confidence level and known data gaps.
- ▣ Note assumptions that could materially change the rating later.

Use the checklist items below as working prompts. Replace placeholders with named owners, dates, and document links. Keep the final version in the same evidence location used for reporting, governance, or programme delivery.

SECTION 3: OWNERSHIP AND RESPONSE

- ☐ Name the business owner and reporting owner.
- ☐ State the response type, avoid, reduce, transfer, monitor, or adapt.
- ☐ Capture blockers, dependencies, and review dates.

SECTION 4: GOVERNANCE AND REPORTING

- ☐ Connect material risks to enterprise risk management where possible.
- ☐ Track changes in risk rating through a formal review process.
- ☐ Archive prior versions and the decision notes behind them.

Suggested next step

Use the completed version as the working document for your next steering discussion, programme review, or submission-planning meeting. Once owners and dates are filled in, move it into the live governance cadence rather than leaving it as a static download.

Need help turning this into a live ESG operating model?

Use this resource as the working draft, then contact us if you want support with ownership, operating cadence, evidence design, or implementation.
