

[DOWNLOADABLE MATRIX](#)

EcoVadis evidence matrix

By DS Consulting | consult-ds.com

A submission-planning matrix covering policy, action, metrics, and supporting evidence across all four themes.

A note on how to use this resource

EcoVadis scores evidence, not intent. Strong programmes still underperform when documents, action records, and metrics are scattered across teams. This matrix is designed to help organisations organise evidence before upload and distinguish packaging gaps from real programme gaps.

Right for sustainability, procurement, compliance, HR, legal, and operations teams preparing for a stronger EcoVadis submission.

SECTION 1: THEME MAPPING

- Create rows for environment, labour and human rights, ethics, and sustainable procurement.
- Map each row to policy, action, metrics, and supporting records.
- Track owner, reviewer, and document location.

SECTION 2: EVIDENCE QUALITY

- Check whether the document is current, approved, and applicable.
- Test whether actions are backed by records, not just narrative.
- Confirm whether metrics are specific, time-bound, and attributable.

Use the checklist items below as working prompts. Replace placeholders with named owners, dates, and document links. Keep the final version in the same evidence location used for reporting, governance, or programme delivery.

SECTION 3: GAP PRIORITISATION

- ☐ Separate packaging gaps from structural programme gaps.
- ☐ Assign a fix owner and due date for every missing item.
- ☐ Escalate themes that need executive intervention.

SECTION 4: SUBMISSION READINESS

- ☐ Lock the evidence list before upload starts.
- ☐ Use clear naming and short descriptions for documents.
- ☐ Archive the final matrix and feedback for the next cycle.

Suggested next step

Use the completed version as the working document for your next steering discussion, programme review, or submission-planning meeting. Once owners and dates are filled in, move it into the live governance cadence rather than leaving it as a static download.

Need help turning this into a live ESG operating model?

Use this resource as the working draft, then contact us if you want support with ownership, operating cadence, evidence design, or implementation.
