

DOWNLOADABLE WORKBOOK

Net zero roadmap starter workbook

By DS Consulting | consult-ds.com

What leadership teams use to move from emissions baseline to owned decarbonisation workstreams.

A note on how to use this resource

Net zero programmes often stall because the baseline exists but ownership, sequencing, and delivery rhythm do not. This workbook is designed to help leadership teams turn climate ambition into governed workstreams with named owners, decision points, and evidence expectations.

Right for CFOs, CSOs, COOs, procurement leaders, operations leaders, and sustainability teams that need a practical first-year roadmap.

SECTION 1: STARTING POINT

- Confirm the organisational boundary and the major hotspot categories.
- Rate data confidence by emissions source and flag where assumptions remain weak.
- Separate controllable emissions from influenceable and structural emissions.

SECTION 2: TARGET-SETTING DECISIONS

- State the target type being considered and why it fits the business context.
- List the preconditions leadership wants before making any public commitment.
- Document the dependencies that sit with finance, procurement, operations, or product teams.

Use the checklist items below as working prompts. Replace placeholders with named owners, dates, and document links. Keep the final version in the same evidence location used for reporting, governance, or programme delivery.

SECTION 3: WORKSTREAM DESIGN

- ☐ Name workstream owners and executive sponsors.
- ☐ Capture first-year actions, required investment, and expected impact logic.
- ☐ Define a minimal KPI set and the evidence each workstream will retain.

SECTION 4: GOVERNANCE CADENCE

- ☐ Set monthly delivery review and quarterly steering review dates.
- ☐ Create a decision log for scope changes, priority shifts, and baseline changes.
- ☐ Record how the roadmap will feed external reporting and target updates.

Suggested next step

Use the completed version as the working document for your next steering discussion, programme review, or submission-planning meeting. Once owners and dates are filled in, move it into the live governance cadence rather than leaving it as a static download.

Need help turning this into a live ESG operating model?

Use this resource as the working draft, then contact us if you want support with ownership, operating cadence, evidence design, or implementation.
