

DOWNLOADABLE PACK

Scope 3 supplier data request pack

By DS Consulting | consult-ds.com

A structured supplier outreach pack for emissions data, supporting evidence, and escalation control.

A note on how to use this resource

Scope 3 work fails when supplier outreach is inconsistent, the ask is unclear, or weak responses are not governed. This pack gives procurement and sustainability teams a common structure for supplier requests, follow-up cadence, and evidence retention.

Right for procurement teams, sustainability leads, finance teams, and operations leaders working through material supplier emissions categories.

SECTION 1: SUPPLIER PRIORITISATION

- ▣ List the highest-priority categories, suppliers, and spend concentrations.
- ▣ Segment suppliers by capability and likely response quality.
- ▣ Define the minimum data set by category before outreach begins.

SECTION 2: REQUEST DESIGN

- ▣ State exactly what is being requested, for which period, and in what unit.
- ▣ Separate data fields from evidence fields.
- ▣ Add a fallback route where primary data is not available.

Use the checklist items below as working prompts. Replace placeholders with named owners, dates, and document links. Keep the final version in the same evidence location used for reporting, governance, or programme delivery.

SECTION 3: FOLLOW-UP CADENCE

- ☐ Track response deadlines, reminders, and escalation points.
- ☐ Record reasons for non-response or low-quality submissions.
- ☐ Define the procurement escalation owner for stalled cases.

SECTION 4: EVIDENCE TRAIL

- ☐ Store supplier responses with a clear naming convention.
- ☐ Capture methodology notes next to submitted data.
- ☐ Log reviewer checks and exception decisions.

Suggested next step

Use the completed version as the working document for your next steering discussion, programme review, or submission-planning meeting. Once owners and dates are filled in, move it into the live governance cadence rather than leaving it as a static download.

Need help turning this into a live ESG operating model?

Use this resource as the working draft, then contact us if you want support with ownership, operating cadence, evidence design, or implementation.
